EC Directive 89/686/EEC

EC Type-examination

Issue 1.

PPE Product

Ultitec 1800 disposable coveralls manufactured from laminated fabric, consisting of a polypropylene substrate to which is laminated a microporous polyethylene film, known as SF.JQ This gives a vapour permeable liquid and particle barrier with a weight of 53 gms/sq metre, which are available in the following styles;

- a) Ultitec 1800, Style DD910 Coverall with elasticated hood, wrists, ankles and waist. Zip front with full length storm flap, internal seams.
- b) Ultitec 1800, Style DD920 Coverall, with elasticated hood, wrists, waist and integral boots. Zip front with full length storm flap, internal seams.
- c) Ultitec 1800, Style DD930 Coverall, with elasticated collar, wrists, ankles and waist. Zip front with full length storm flap, internal seams.

All garments are available in white and in six nominal sizes, plus custom sizes to order

It is certified that the manufacturer's technical file and the above mentioned PPE have been assessed and found to be in accordance with the requirements of Council Directive 89/686/EEC. When examined the PPE satisfied the requirements in the relevant harmonized standards:

EN ISO 13982-1:2004 + A1:2010 (Chemical protective clothing providing protection to the full body against airborne solid particulates) for Type 5, limited wear life clothing;

EN 13034:2005 + A1:2009 (Chemical protective clothing offering limited protective performance against liquid chemicals) for Type 6, limited wear life, full body protection;

EN 14126:2003 (Protective clothing against infective agents) for Type 5-B, 6-B, limited life, full body protection.

EN 1149-5:2008 (Protective clothing - Electrostatic properties) for electrostatic dissipative protective clothing with a surface resistance of $\leq 2.5 \times 10^9 \Omega$ on the inner surface of the fabric.

In addition with one exception the PPE satisfied the requirements of EN 1073-2:2002 (Protective clothing against particulate radioactive contamination - Non-ventilated clothing) with a performance classification of TIL Class 1. The exception is that clause 4.2 specifies that the minimum puncture resistance should be level 2, but the fabric used has a puncture resistance classification of level 1.

The manufacturer's information notice (Ultitec 1800, STYLE Nos. DD910, DD920, DD930, Issue 1, Revision 1), in English, has been inspected and found to have addressed all of the relevant requirements of the standards. However, the detailed content of the information notice is the responsibility of the manufacturer, as are translations into other languages.

This certificate is issued on the strict condition that appropriate checks on manufactured PPE, as detailed in Article 11 of the Directive are implemented and maintained while the model is in production.

Certification is based on technical file reference: Ultitec Disposable Protective Wear Style 1800, Issue 1, Revision 1.
