

**Product ID:**  
RGL28

**Product Name:**  
Twin Leg Self Retracting lanyard

The RGL28 Chaser has been specifically designed to eliminate working hazards. It is fully retractable and must be used in conjunction with a fall arrest harness.

The RGL28 Chaser is a twin leg self-retracting lanyard, the extra leg allows movement between anchorage points by means of double clipping. It has an almost instant lock off in the event of a fall, and recoils into the drum when slack is introduced into the lanyard. The reduced trip hazard and ultra-compact design make this unit ideal for tight work and tasks where a shorter arc of mobility is required. The RGL28 Chaser has a maximum working length of 2m. Suitable for MEWP operators.

The chaser is certified to EN 360:2002. Additionally, it also meets the dynamic requirement of EN 355:2002, which involves a 100kg mass dropped a distance of twice the length of the extended lanyard, and the peak force below 6kN. For details of daily inspection procedures, please read the information sheet.

**Accredited to:**

EN 360:2002

**Material:**

15mm high strength UHMWPE

**Fittings:**

RGK2P and 2 x RGK11SL

**Max arrest force:**

<6kN

**Weight:**

2.15kg

**Length(s):**

0.75 - 1.2m

1.05 - 2m

**Features:**

Shock Absorbers

Scaffold Hooks

Fitted with shock absorber pack and retractor units with protective covers. For workers up to 140kg in weight
